FAN OFICIAL

LA EMPRESA
The Company

WEGA, marca comercial de R. NETO S.A. en el mundo, provee una amplia gama de productos incluyendo: filtros de aire, aceite, combustible y cabina, lámparas halógenas, leds, bujías de encendido, bujías de precalentamiento y bocinas, que aplican a vehículos americanos, europeos y asiáticos.

El prestigio alcanzado por la compañía durante su sólida trayectoria la ha posicionado como líder en la industria automotriz a nivel nacional e internacional, formando una extensa red de distribuidores y representantes en Argentina, Bolivia, Chile, Colombia, Costa Rica, Ecuador, Honduras, Paraguay, Perú, Uruguay y Brasil, donde ha desarrollado incluso una filial, en el estado de Santa Catarina.

WEGA cuenta con el catálogo de filtros más completo del rubro, y anticipándose a las necesidades del mercado de reposición, se diferencia por la rápida incorporación de nuevos desarrollos, ofreciendo mensualmente lanzamientos de productos que satisfacen los requerimientos de los diferentes mercados de destino y amplían continuamente las opciones disponibles.

La planta industrial de R. NETO S.A, certificada bajo normas ISO 9001, ISO 14001 e ISO/TS 16949, desarrolla una numerosa variedad de productos, desde piezas homologadas para abastecimiento de equipos originales hasta artículos para reconocidas marcas. Inspirada en la filosofía ***Lean Manufacturing***, la compañía lleva a cabo sus procedimientos utilizando las mejores prácticas de manufactura que le permiten incrementar el grado de eficiencia en la actividad y ofrecer un producto de probada calidad superior.

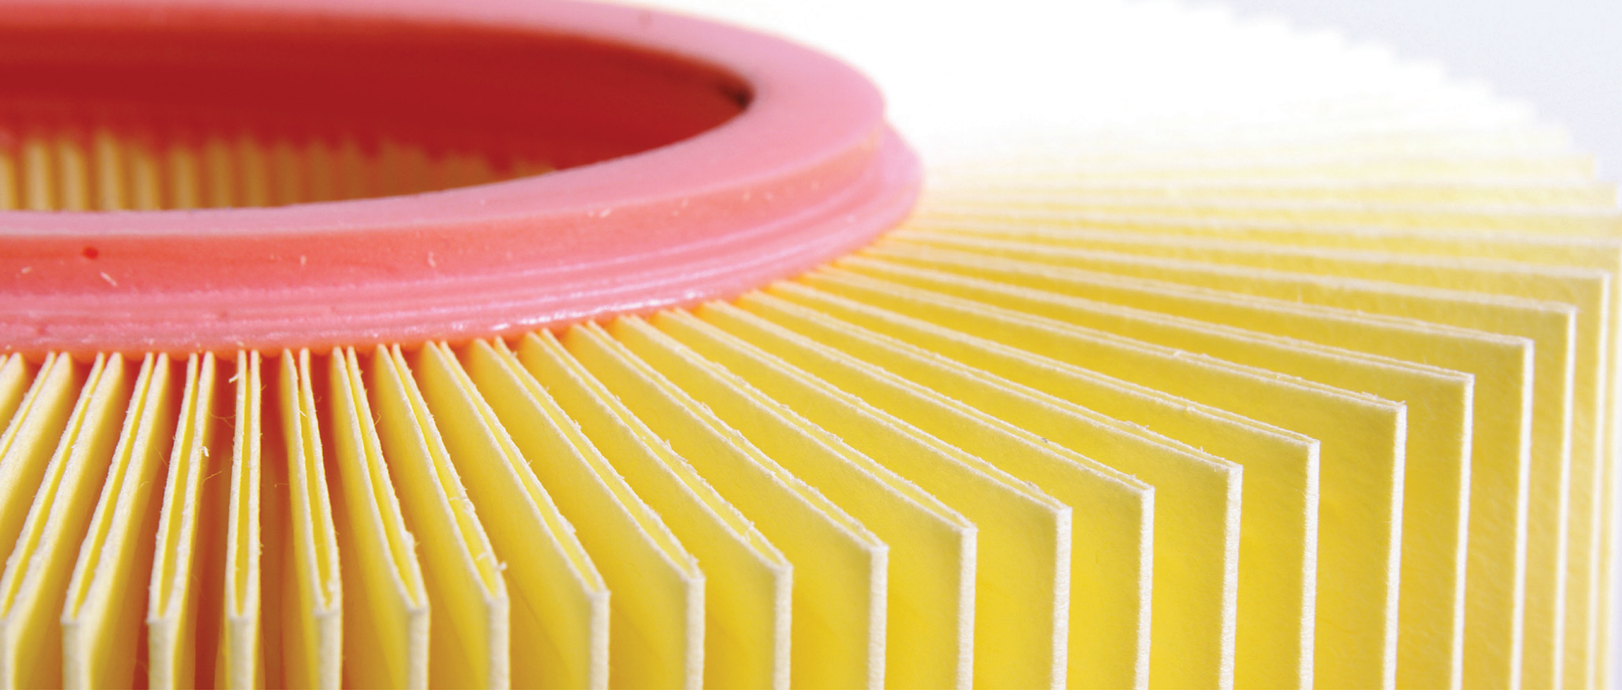
Con el objetivo de procurar la continuidad a futuro R. NETO S.A. realiza continuas inversiones para fomentar un desarrollo sostenible. Implementa permanentemente nuevas tecnologías aplicadas a sus líneas de producción y desarrollo, optimiza los sistemas de gestión de calidad y opera en su renovado laboratorio de ensayos y control. Se ocupa, además, del fortalecimiento de la imagen corporativa para su posicionamiento y trabaja sobre la mejora en el almacenamiento y la logística, priorizando la innovación continua para la apertura de nuevos mercados.

WEGA refuerza su compromiso social haciendo foco en su equipo laboral, capacitando en forma constante a sus recursos humanos, ofreciendo incluso jornadas de charlas técnicas extendidas a clientes y vendedores.

Consciente también de la necesidad del cuidado del medioambiente, ha minimizado el impacto ambiental de sus actividades con la incorporación de nuevas tecnologías sustentables que reducen el consumo energético.

A casi 50 años de su fundación la empresa de origen familiar se ha convertido actualmente en una compañía industrial, comercializadora y exportadora que invierte en el país creando oportunidades en el presente y continuidad para las futuras generaciones.

WEGA, a trademark of R. NETO S.A. in the whole world, offers a wide range of products, including: air, oil, fuel and cabin filters, light bulbs, LEDs, spark plugs, glow plugs and horns for American, European, Japanese, and Korean vehicles. The prestige gained by the company during its solid trajectory, the technological innovation and the high quality of its products have contributed to positioning WEGA among the leader brands in the global automobile industry. R. NETO S.A. sells its WEGA products through a large network of distributors and representatives in Argentina, Brazil, Bolivia, Chile, Colombia, Costa Rica, Ecuador, Honduras, Paraguay, Peru and Uruguay. The commercialization of products, marketing actions, development of the corporate image and commitment to customers and end users are based on the cornerstones of corporate ethics and social responsibility. WEGA has the most comprehensive filter catalog, and anticipating the needs of the replacement market, the brand makes a difference by rapidly incorporating new developments, launching every month products that satisfy the requirements of different target markets, continuously expanding its product portfolio. The Company, certified under ISO 9001:2015, ISO 14001:2015, and ISO TS 16946:2009, manufactures products for original equipment and for well-known private brands. Inspired by the Lean Manufacturing philosophy, the company performs its procedures in accordance with the best manufacturing practices, which improve the efficiency rate in the activity and make it possible to offer products of proven superior quality. In order to secure the continued operations of the company obtaining a sustainable growth, WEGA continuously makes investments in new technologies applied to its production, engineering, and development lines, quality management systems, testing lab, storage and logistics, ongoing training of human resources, technical training courses for customers and sales representatives, strengthening of the corporate image and opening of new markets. As part of its international expansion process, the company has a significant presence in the Federative Republic of Brazil, through a subsidiary located in Itajaí, State of Santa Catarina, commercial offices in Sao Paulo and representation in every State. The social commitment of WEGA is evidenced by its respect of human rights by offering decent working conditions that promote the safety, work health and human and professional development of its employees. Truly aware of the need to protect the environment and the community, the company has minimized the environmental impact of its activities by incorporating sustainable resources and new technologies which, in turn, reduce energy consumption. Today, 50 years after its foundation, the family company has turned into an industrial, marketing and exporting company which invests in the country, creating opportunities in the present and continuity for future generations.

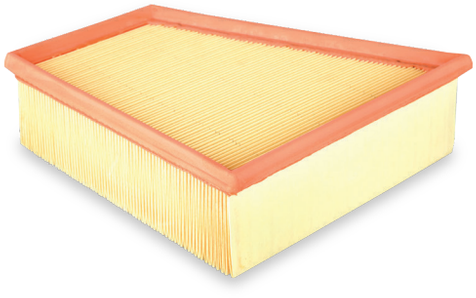


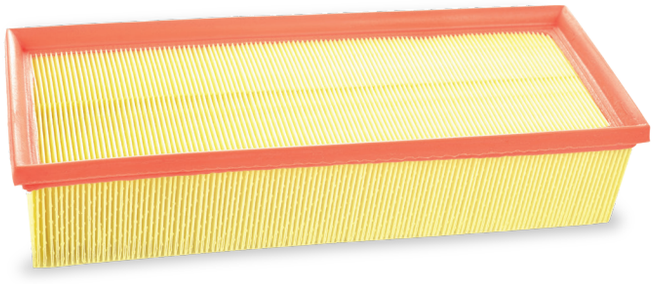
FILTROS PARA AIRE
Air Filters

Una limpia admisión de aire es esencial para el funcionamiento correcto del motor, ya que el ingreso de contaminantes como partículas, polvo y hollín, entre otros, podrían causarle corrosión prematura.

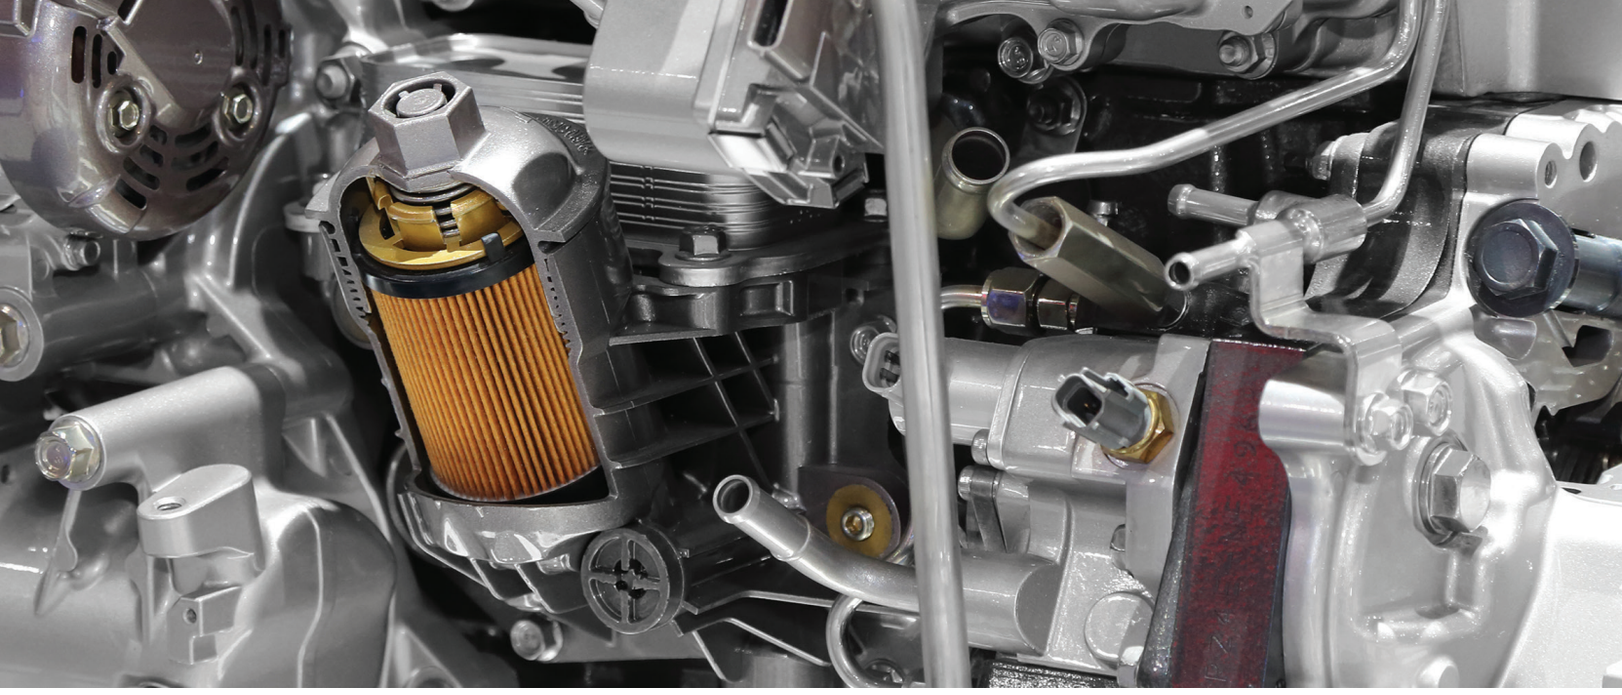
Los filtros WEGA pueden asegurar una limpia admisión de aire, debido al uso de papel filtrante de altísima calidad y permiten una correcta composición de la mezcla entre aire y combustible, asegurando una performance consistente del motor para su óptimo funcionamiento.

Por lo tanto, el uso de filtros WEGA garantiza la efectividad en el rendimiento del motor, preservando su vida útil.





A clean intake of air is essential for engines to run smoothly. However, pollutants such as particles, soot, etc. come in with the air. The result: dirty particles enter the combustion chamber, causing early corrosion in the engine. Electronic components such as sensors, which are located between the intake and the combustion chamber, may be damaged or even destroyed. WEGA air filters guarantee a clean air intake, since they are manufactured with filtering paper of the highest quality. WEGA air filters allow for the optimal composition of the air/fuel mixture and guarantee a consistent performance of the engine. Therefore, with high-quality air filters, the engine benefits from low fuel consumption and better performance.



FILTROS PARA ACEITE
Oil Filters

Para la correcta operación del motor es imprescindible mantener el aceite limpio, sin impurezas corrosivas.

La degeneración del mismo aceite durante el proceso de lubricación y el resultado de la combustión provoca que partículas de suciedad y residuos como el hollín, puedan contaminarlo, dándole una consistencia viscosa y afectando el funcionamiento general del motor.

Sin embargo, gracias a la implementación de papeles especiales, el filtro de aceite WEGA puede asegurar un filtrado eficiente y logra que las impurezas sean removidas de manera correcta. Esta eficacia en el filtrado genera un mínimo agotamiento del motor y prolonga notablemente su vida útil.

Los motores modernos demandan una alta performance del motor y al mismo tiempo reducen el consumo de combustible. Solo el aceite limpio puede asegurar que el funcionamiento del motor sea el adecuado.

Las unidades selladas tienen una gran cantidad de componentes metálicos, los cuales son de difícil reciclaje a la hora de desecharlos. Para evitar mayor contaminación ambiental, el mercado ha desarrollado filtros ecológicos, que están fabricados únicamente con elementos biodegradables tales como papel, plástico y adhesivos.

Wega lanzó en los últimos años la línea más completa de filtros ecológicos, que cubren la totalidad de aplicaciones del mercado argentino, tanto para vehículos livianos como pesados. Y, acordes a la evolución de los motores actuales, se adecúan perfectamente a las condiciones químicas y térmicas más extremas.

The key factor for the proper operation of the engine is to maintain lubrication oil clean, and make sure there are no corrosive impurities in the oil. As a result of the combustion, dirt particles and combustion waste such as soot form inside the engine oil, which contaminate the oil and make it more viscous. This means the oil provided is not in good conditions and that the protection against corrosion may not be guaranteed for a long time. As a result, the engine useful life is affected, and in the worst-case scenario, the engine could be damaged. Current engines require high performance and, at the same time, reduced fuel consumption. Only clean oil may guarantee the proper operation of the engine. As they use special filtering papers, WEGA oil filters provide an efficient filtering process. The impurities in the lubrication oil may be effectively removed, reaching the highest filtering efficiency and the lowest engine wear, thus extending the engine useful life. Sealed units have a large number of metal components, which are very difficult to recycle at the time of disposal. To avoid greater pollution of the environment, the so-called eco-friendly filters have been developed. They are manufactured only with completely biodegradable elements: paper, plastic, and adhesives, eliminating metal parts that may not be recycled. During the last years, WEGA has developed the most comprehensive line of eco-friendly filters, which cover all the applications in the Argentine market, both for light or heavy weight lines. Due to the evolution of current combustion engines, oil filtering systems are increasingly demanding. WEGA manufactures eco-friendly filters with the adequate filtering elements to endure the most extreme chemical and thermal conditions.

FILTROS PARA COMBUSTIBLE

Fuel Filters

El combustible limpio, libre de impurezas, es un requerimiento básico para un funcionamiento óptimo. Sin embargo, durante las cargas de combustible, cuando éste ingresa al sistema de inyección o al carburador por medio de la bomba, suelen ingresar también contaminantes que pueden ocasionar problemas.

Por esto, es indispensable contar con una alta eficacia del filtrado, capaz de remover impurezas y garantizar un seguro funcionamiento del sistema de inyección de combustible.

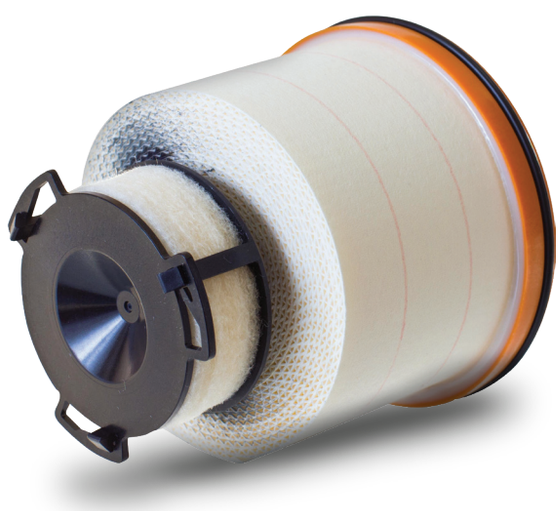
Los sistemas modernos tales como common-rail necesitan soluciones innovadoras, sujetas a nuevos diseños, por eso Wega crece con el desafío de todas las demandas de la industria automotriz, produciendo filtros de reconocida calidad.

Los filtros para combustible WEGA desarrollan las siguientes funciones:

- Proveen seguridad operacional para los motores.

- Remueven del combustible los contaminantes no deseados, como polvo, óxido y agua, que pueden causar desgaste.

- Protegen el delicado mecanismo de inyección contra la corrosión.



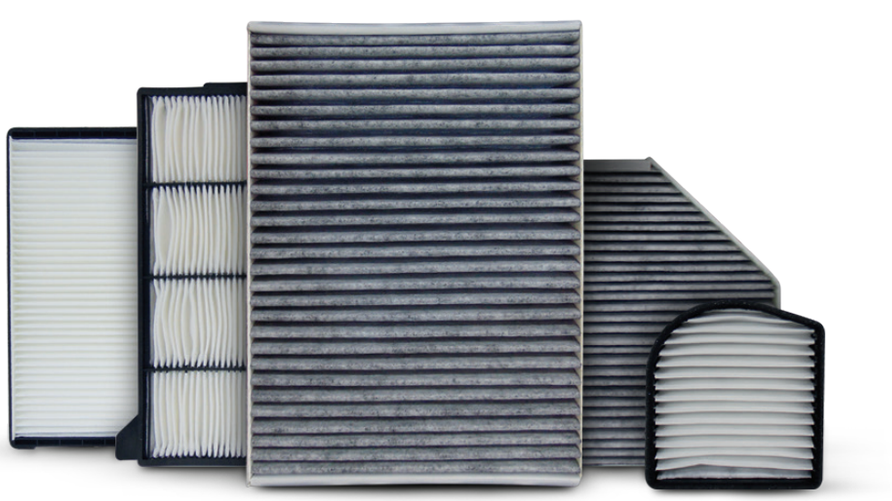
Clean fuel is an essential requirement for engines to run smoothly. The fuel reaches the injection system or the carburetor through the fuel pump. The key factor for the proper operation of the injection system is clean fuel free of impurities. However, very often pollutants enter the fuel tank during fuel refill. Therefore, fuel filters that are highly efficient to remove impurities and pollutants guarantee the safe operation of the fuel injection system. Current injection systems, such as common-rail, require innovative solutions according to new designs. WEGA filters improve with every challenge posed by the automotive industry requirements, with a range of high-quality fuel filters. WEGA fuel filters have the following functions: Offer operational safety for engines // Remove from the fuel undesirable pollutants, such as dust, rust and water, which may wear the engine.// Protect the highly delicate injection mechanism against corrosion.

FILTROS PARA CABINA
Cabin Filters

El aire en las áreas urbanas contiene grandes cantidades de polvo, polen, hollín y gases, que son perjudiciales para la salud e ingresan normalmente al auto. La contaminación en vehículos es, incluso, hasta tres veces mayor que en la vía pública.

Los filtros de cabina WEGA son reconocidos tanto local como internacionalmente, ya que remueven el 99% de estas partículas indeseadas, asegurando así una mejor atmósfera dentro del auto. Esto es particularmente importante para las personas que sufren alergias.

Nuestros filtros de cabina se fabrican con componentes 100% sintéticos, que tienen una retención mayor al 98% de las partículas contaminantes y garantizan una mayor pureza de aire en la cabina del vehículo.



The air in urban areas contains huge quantities of dust, pollen, soot and other particles, as well as gases which are harmful to the health. WEGA cabin filters are well known by local vehicle manufacturers and also by international manufacturers. WEGA filters remove 99% of pollen and other undesirable particles, improving the atmosphere inside the vehicle. This is particularly important for people suffering from allergies. WEGA cabin filters are manufactured with a 100% synthetic filtering element which retains over 98% of contaminant particles, providing greater air purity inside the vehicle cabin.

FILTROS DESECADORES DE AIRE

Air sprinkler filters

Los filtros desecadores de aire WEGA son diseñados para secar el aire que utilizan los vehículos pesados en sus sistemas neumáticos, por ejemplo, en los frenos. Esto es de gran importancia, debido a que el ingreso de humedad podría causar una corrosión implicando graves daños en el sistema.

Los filtros WEGA garantizan la mejor protección para los frenos y las partes neumáticas, gracias a su óptimo funcionamiento y su excelente calidad.

WEGA brake air sprinkler filters are designed to dry the air used in heavy weight vehicles, in their pneumatic systems, such as the brake system, because if water enters the pneumatic system it would cause significant corrosion and, consequently, serious damage to the system. Our filters guarantee the best possible protection for brakes, thanks to their excellent operation and quality.

WEGA
ORIGINAL QUALITY

WEGA: CALIDAD CERTIFICADA

Certificamos normas internacionales que garantizan no solo la calidad de nuestros productos y el compromiso para con el cuidado del medio ambiente, sino que también, homologan nuestros filtros para el abastecimiento de las terminales automotrices.

Certified IQNet Management System

ISO/TS 16949

Norma que tiene el propósito de armonizar a nivel global los diferentes sistemas de evaluación y certificación en la cadena de suministro del sector automotriz. Introduce un conjunto de técnicas y métodos comunes para el desarrollo de productos y procesos en la industria a nivel mundial.

ISO 9001 BUREAU VERITAS Certification

ISO 9001

Norma internacional orientada a la mejora en la gestión y la capacidad de proporcionar regularmente tanto productos como servicios, legales y reglamentarios, que satisfagan los requisitos del cliente.

ISO 14001 BUREAU VERITAS Certification

ISO 14001

Norma que permite crear opciones para contribuir al desarrollo sustentable. Proporciona a las organizaciones un marco de referencia para la protección del medio ambiente y sus condiciones cambiantes, en equilibrio con las necesidades socioeconómicas.
